Description

F175XCB Yamaha 4 Stroke 175hp DEC Extra-Long Shaft, Electric Start, Power Trim & Tilt OUTBOARD FOR SALE

Yamaha’s popular and proven range of F175 Digital and Mechanical Control outboards now feature a newly designed look and integrated steering, taking these engines to the next level when it comes to power, reliability and control.

The Integrated Hydraulic Steering system is housed in a neat, sealed cylinder unit, which is built into the transom bracket of the engine, rather than being a third-party bolt-on component. This results in a simple and clean rigging set-up, and an uncluttered bilge and transom area, while exposing less components to the elements for improved long-term durability and reliability.

This new range of four-cylinder integrated steering models are ideal for all applications, including new boat packages, existing boat repowers and multi engine set-ups.

The modernised F175 outboards bring a new level of delight to boating.
