YAMAHA
4-Stroke

Yamaha's popular and proven range of F175 Digital and Mechanical Control outboards now feature a newly integrated tank and integrated steering, making these engines the most level when it comes to power, reliability and control.

The Integrated Hydraulic Steering system is housed in a neat, sealed cylinder unit, which is built into the torsion bracket of the engine, rather than being a third party bolt-on component. This results in a simple and clean rigging set-up, and an unobstructed bilge and transom area, while keeping the components to the elements for improved long term durability and reliability.
