FOUR-STROKE

F175

Yamaha's popular and proven range of F175 Digital and Mechanical Control outboards now feature a newly designed link and integrated steering, taking these engines to the next level when it comes to power, reliability and control.

The Integrated Hydraulic Steering system is housed in a neat, sealed cylinder unit, which is built into the transom bracket of the engine, rather than being a third party bolt-on component. This results in a simple and clean-looking set-up, and an unobstructed edge and transom area, whilst keeping the components to the elements for improved long-term durability and reliability.

ADVANCED POWER PLANT

- 2700cc four-stroke engine.
- In-line design delivers excellent fuel efficiency.
- All-new Integrated Hydraulic Steering.
- All-new cooling design.
- Built-in oil locker.
- Choose Digital Electronic Control (DEC) or Mechanical Control (MC).
