

Yellowfin YF-70 Extended Cabin + Yamaha F200hp 4-Stroke - Pack 2 for sale online prices

\$149,790

Description

Get onboard and experience the best offshore performance a 7m plate boat can give with the Yellowfin YF-70 Extended Cabin. Engineered for those who demand the best, this model boasts a 45% increase in cabin space, offering luxurious comfort and expansive room. The 6mm bottoms form Yellowfin's signature Offshore HD-R Hull with Inter-Lok Core, ensuring superior strength and stability. This robust design is complemented by increased dash real-estate, capable of accommodating both 16" and 19" sounders side by side, making it an angler's dream.

Paired with the exceptional Yamaha F200HP 4-Stroke, this vessel promises peak performance. Featuring forward control with a side concealed control box and fly-by-wire technology, it includes 2 LAN multifunctional digital gauges and integrated hydraulic steering. The power trim & tilt with TotalTilt integrated limiter ensures easy handling, while the electric start and key switch add convenience. This engine is perfectly matched with a motor support block to prevent excess load on the tilt assembly, enhancing longevity and reliability.

This package is completed with top-of-the-line electronics and support features. The Garmin GPSMAP® 953XSV chartplotter/sounder combo, preloaded with Garmin Navionics+ Australia & New Zealand Mapping, offers built-in sonar compatibility. Upgrading to the GT56UHD transducer provides ultra high-definition ClearVü and SideVü scanning sonars. Communication and safety are paramount with the Garmin 215i AIS marine radio, featuring DSC functionality and a 25-watt transmit power with built-in GPS. With marine-grade battery and isolation switch, high-pressure deck wash, and a fully carpeted, cushioned cabin, the YF-70 Extended Cabin is equipped for any adventure. Some key advantages Yellowfin have over other manufacturers

Feature Benefit Description

Inter Lok Core Strength Full height stringers with inter-locking gibs make for maximum strength and durability.

6mm Bottom Sheets Strength 6mm bottom sheets not only add strength to the boat but make for a softer ride too.

Quad Welded Chines & Keel Strength Both chines and the keel are welded 4 times (twice externally and twice internally), adding massive amounts of material and strength to the already rigid Inter Lok Core.

Self Draining Floor & Bilge Pumps Safety Yellowfin floors are fully welded from cabin to transom, and are built above the waterline, allowing for scupper drains to take care of any unwanted water on the deck. Bilge pumps are also included as a backup measure.

Foam Filled Safety & Noise Reduction Our foam is commercial grade marine foam, compliant with the National Standard for Commercial Vessels, making it fuel and water resistant. Not only is it a key safety feature but it has acoustic benefits too, making each Yellowfin boat incredibly quiet.

U-Dek Safety & Noise Reduction EVA foam makes for non-slip surfaces and greatly reduces hull noise.

External Fuel Filler Safety & Practicality All Yellowfin boats come with external fuel fillers as an added layer of safety as well as practicality. Service stations do not allow vehicles to be fueled from the inside due to inherent risks.

HD-R Hull Handling & Performance A 20-degree variable deadrise in combination with reverse chines and extended planning strakes give Yellowfin boats a soft ride, great stability at rest and trim-responsive handling underway.

Full Length Spray Chines Handling & Performance Full length spray chines not only keep our boats incredibly dry, but they aid in hydrodynamic lift and grip when cornering.

External Keel Handling & Performance Our single-piece external keel runs the entire length of each boat. This key feature keeps each Yellowfin straight and true underway, which is incredibly important particularly in following seas.

PACK 2 INCLUSIONS:

-

YELLOWFIN YF-70 EXTENDED CABIN - Painted in white
